

CONCERA® | All-in-One
Admixture

High-flow Low-slump Zero-slump SCC

ENHANCE MOVEMENT AND FINISH ACROSS A VARIETY OF CONCRETE APPLICATIONS

From drycast to SCC mixes, CONCERA® can increase productivity, reduce costs, enhance workability and help achieve sustainability goals.

Customer Services: **+1 877 423 6491**

The unique combination of polycarboxylate dispersants and rheology modifiers give CONCERA® its flexibility for a variety of applications, from low slump mixes that easily slide down a truck chute and quickly feed through curb and barrier machines, to higher flow mixes that will pump consistently for several hundred feet.

CONCERA® All-in-One admixture makes consistent, high quality concrete easily achievable for ready mix precast and concrete contractors.

Please review the key benefits below and reference our technical bulletins for additional details specific to your application.

CONCERA® All-in-One Admixture key benefits

APPLICATIONS	PRECAST			READY MIX			
	DRY CAST	CONTROL FLOW	SCC	LOW SLUMP	TRADITIONAL	CONTROL FLOW	SCC
Faster Cycle Times	✓			✓			
Faster Truck Turns				✓	✓	✓	
Faster Placement		✓	✓	✓	✓	✓	✓
Enhanced Pumpability					✓	✓	
Improved Strength	✓	✓	✓	✓	✓	✓	✓
Improved Finishability with Harsh Materials	✓	✓	✓	✓	✓	✓	✓
Improved Surface Quality	✓	✓	✓	✓	✓	✓	✓
Segregation Resistant		✓	✓			✓	✓
Enhances Sustainability	✓	✓	✓	✓	✓	✓	✓
Labor Savings	✓	✓	✓	✓	✓		✓
Minimal Vibration			✓	✓			✓
Reduces Plastic Shrinkage	✓	✓	✓	✓	✓		✓

APPLIED BENEFITS WITH CONCERA®

- The enhanced finishability and movement under energy creates easier placement under all slump conditions, leading to reduced labor and wear on workers
- Better pumpability speeds the placement process and reduces wear on the pump truck
- Improved finishability and strengths allow for the reduction of cement and increased use of local manufactured sands resulting in the potential for CO₂ reduction
- Faster cycle times improve equipment efficiencies in curb and barrier wall as well as drycast
